

Second hand equipment “Chipper line”

SAB-chipper and profiling unit, composed of:

Machine systems:

2 parallel chippers type PSP 500 with 2 x 55 KW main motors and and new chipper discs

feed units for rough and precision cutting

1 profiling and sawing unit type PKA 300 with 4 x 50 KW sawing motors and 4 x 30 KW milling motors as well as an infeed and centering unit

1 side cut separator for profiling unit

1 log turning device

1 roller table- length approx. 6 m

Technical details:

Feed rate: Infinitely variable between 30 and 70 m/min.

Log diameter: max. 350 mm

Year of construction: 1998

All machines are dismantled, and the machine components are overhauled in our works in Bad Berleburg.
